Subject: enhanced spreadsheet, nutrients

Hi Tina;

Since we have agreed to use the 'MT_facility_summary_table-(1-7-2016).xlsx' spreadsheet as the basis for our analysis of what dischargers are currently discharging today, I have begun to enhance the spreadsheet by filling in the data gaps for flow for the private facilities. I used the 2012 "Private Sector" DEQ document as a starting point to assure I am capturing nutrient-discharging private facilities, and these are aligning so far pretty well with the ones in your spreadsheet for which there exists documented nutrient data.

I had our ICIS folks pull the last two years (2014-2016) of private-permittee flow data to calculate their flows.

With these additional data, we will be able to group the facilities by our discharge-volume based categories. I think I know how to code those that are lagoons too, but need to work on that a bit more.

When I am done entering data, would you like a copy to work from ?

-Mike
